Summary

Results-driven Full Stack developer with over 2 years of experience in the software development and consulting industries. Proven track record in solving complex problems through analytical thinking and innovative solutions. Adept at delivering scalable, high-performance software systems that align with business objectives. Eager to leverage technical expertise and drive continuous improvement in a dynamic and challenging environment. Actively seeking new opportunities to contribute to cutting-edge projects and further career growth.

Experience

PwC India | Kolkata, India

Full Stack Web Developer | 06/2022 - Present

- **PwC US, Fortune 50 Client:** Led the development of a dynamic forecasting tool and dashboard, enabling data-driven decision-making for future planning. Utilized front-end (React.js) and back-end (Python Flask) technologies, as well as cloud platforms, to build scalable, efficient systems for key data analysis and visualization. Oversaw parts of DevOps using GitLab for continuous integration.
- **Private Equity Firm, Software Development:** Designed and developed a comprehensive employee management and bonus calculation software solution. Leveraged Angular and AWS services (Lambda, API Gateway, Amplify) alongside PostgreSQL for product development and maintenance. Ensured system stability, data security, and alignment with business objectives, delivering a reliable, long-term solution. Managed deployment and provided ongoing client support.
- **PwC US, Legacy System Modernization:** Contributed as a full-stack developer to maintain and optimize a legacy data management application, supporting data flow from various sources into ETL processes. Technologies included Angular (front-end), Python Flask (back-end), and SQL Server. The application processed financial market data, providing actionable insights. Played a key role in DevOps using Azure DevOps.
- **PwC US RMS, Climate & ESG Management Tool:** Led the development of a full-stack application focused on climate change and ESG resource management for multinational corporations. The product served as both a mathematical and analytical tool for managing carbon emissions. Developed using JavaScript, jQuery (front-end), Python Flask (back-end), and Microsoft SQL Server. Delivered optimal design solutions and sustainable outcomes based on client needs, while ensuring performance optimization. Managed CI/CD pipelines using Git and Azure DevOps.
- **PwC India, Asset Management for Private Equity Firms:** Developed a comprehensive full-stack application for managing user data, hedge fund, and liquid fund calculations. Utilized Angular (front-end), Python Flask (back-end), Microsoft SQL Server, and Power BI for embedded analytics. Deployed the application via Azure App Service, using Git for collaboration and version control. Provided long-term support and enhancements based on client feedback.
- **Legacy System Migration:** Strategically modernized a legacy application (built with .NET, jQuery, and SQL Server) deployed on AWS EC2, configuring and maintaining the existing codebase while leading the transition to modern technologies.
- **Chat Interface for PwC US RMS:** Developed a React-based web application to integrate with the OpenAI API, creating a ChatGPT-like interface to enhance client engagement.

PwC India | Kolkata, India

API and Cloud Developer | 11/2023 - Present

- Designed and developed API using .Net, C#, Microsoft SQL server to automate Email functionalities using SMTP server.
- Developed SQL scripts to migrate different elements in a enormous database.
- Developed performance related optimizations using index in the database.
- Developed API using .Net, C#, Microsoft SQL server and used Azure function apps(serverless) to automate and fetch different files provide by different financial institutions and process the files to extract Market data and process those data using ETL pipelines.

Novus Inc

Intern | 03/2021 - 07/2021

Interned at a US based startup Novuz INC and learned different components of compiler design using LEX and YACC.

Skills

Angular, ReactJS, JQuery, JavaScript, .NET, C#, Node.js, Git, HTML 5, CSS3, SQL, SQL Server, PostgreSQL, Redshift, C++, Python, Azure, AWS, Communication skills, Scrum Software Development, GraphQL

Education

Jadavpur University | Kolkata, India
BE(Bachelor of Engineering) | 06/2022
First class with honours (8.1 CGPA)

Maresh Sree Ram Krishna Asram Vidyalaya | Serampore, India
03/2018
Completed 10th with 91 percentage and 12th with 85 percentage.
